

Meddah Sarra

Final Year Engineering Student

Bizerte, Tunisia

Phone: +216 52 564 648

Email: Sarra.Meddah@esprit.tn

LinkedIn: <https://www.linkedin.com/in/sarra-meddah-13353b366>

Willing to relocate nationally or internationally

Seeking a final-year internship opportunity with a minimum duration of 6 months

Summary

Cloud Infrastructure Engineer and Full-Stack Developer with experience in OpenStack, Kubernetes, Azure, and DevOps. Skilled in automation, CI/CD, containerization, and secure system design. Passionate about AI and Machine Learning with hands-on Python experience for data analysis and model development.

Experience

Full-Stack Developer Intern

Jul 2025 – Sep 2025

Expertise and Softwares for Individuals and Business – Tunisia

- Developed a React-based web application with an Express.js backend to manage and visualize medication data.
- Integrated intelligent search and filtering features powered by Python-based data processing to enhance accuracy and user relevance.
- Applied data cleaning and preprocessing techniques using Python and Pandas to ensure high-quality, AI-ready datasets.
- Collaborated with a multidisciplinary team to improve data accessibility and support future integration of AI-driven recommendation features.

Tools: React, Express.js, Node.js, Python, Pandas, REST APIs, MySQL

Cloud Infrastructure Engineer

Oct 2024 – May 2025

Academic Project – ESPRIT Cloud Architecture

- Implemented and managed a hybrid cloud infrastructure using OpenStack and Kubernetes, hosting 30+ virtual machines and multiple microservices.
- Streamlined CI/CD processes through Jenkins and GitLab CI integration, accelerating deployment cycles by approximately 40%.
- Configured centralized monitoring and alerting with Prometheus and Grafana to ensure proactive issue detection and performance optimization.
- Developed a full-stack rental management application with Angular and Spring Boot, efficiently handling large-scale data operations.

Tools: KVM, VMware, Linux, Ansible, Heat, Terraform, Docker, OpenStack (Controller, Compute, Storage nodes), Kubernetes, Azure, Grafana, Prometheus.

Software Developer Intern

Jul 2024 – Aug 2024

Accrosport – Tunis, Tunisia

- Developed a full-featured e-commerce web application with Angular and Spring Boot, including product catalog, shopping cart, and secure online payment system.
- Integrated real-time stock and order tracking to improve inventory accuracy and customer satisfaction.
- Implemented RESTful APIs for product management and user authentication, ensuring scalability and maintainability.
- Deployed the application on a cloud environment with Docker containers, improving reliability and performance.

Tools: Angular, Spring Boot, Docker, REST APIs, MySQL, Stripe, Git

Software Developer Intern

Feb 2023 – Jul 2023

CSI Digital – Tunis, Tunisia

- Designed and developed an intelligent ERP system for IT company management, integrating an HR module with AI-based candidate scoring, automated resume screening, and interview evaluation assistance.
- Implemented CI/CD pipelines using GitHub Actions for automated testing, containerization, and deployment to a cloud environment.
- Enhanced system scalability and reliability by applying DevOps principles for continuous integration and monitoring.

Tools: Angular, Spring Boot, Docker, GitHub Actions, MySQL, Scikit-learn

Software Developer Intern

Jun 2022 – Aug 2022

STIR – Bizerte, Tunisia

- Developed a web-based HR management application using Symfony to streamline employee records, leave management, and HR workflows.
- Implemented secure authentication and role-based access control to protect sensitive employee data.
- Automated routine HR processes, reducing manual administrative tasks by 30%.
- Deployed the application on a cloud environment with Docker and monitored system performance using Grafana.

Tools: Symfony, PHP, MySQL, Docker, Grafana, Linux

HealthPredict, Academic Project

Mar 2022 – May 2022 Tunisia

- Developed a Streamlit-based machine learning application to analyze patient health data and provide predictive insights for clinical decision-making.
- Applied data preprocessing, feature engineering, and model evaluation to improve prediction accuracy by 20
- Deployed the model with interactive visualizations, enabling healthcare professionals to explore risk factors in real time.

Tools: Python, Streamlit, Scikit-learn, Pandas, Matplotlib

Education

IT Engineering Student

2023 – Present

The Private Higher School of Engineering and Technology (ESPRIT), Tunis Ghazela, Tunisia

Key Courses: OpenStack, Azure, Kubernetes, CI/CD, DevOps, Ansible

Bachelor Degree in Business Intelligence

2020 – 2023

Higher Institute of Management (ISG), Bizerte, Tunisia

Key Courses: Data Analysis, Data Warehousing ETL Processes, Cloud Security, Power BI, Databases SQL

Baccalaureate in Experimental Sciences

2020

Hbib Thameur High School, Tunisia

Skills

Cloud: OpenStack, Kubernetes, Docker, Azure, AWS, Ansible, VMware, KVM, Terraform, OpenShift

Programming: Java, Python, TypeScript, JavaScript, Bash, SQL, JSP

Frameworks: Spring Boot, Angular, Symfony, Express.js, React, Laravel

DevOps / CI-CD: Git, GitLab CI, Jenkins, Terraform, Prometheus, Grafana, Nagios

Databases: PostgreSQL, MongoDB, MySQL, Oracle, Redis, MariaDB, SQL Server

Networking: TCP/IP, VLANs, DNS, OSPF, RIP, Cisco, VPN, LDAP, Load Balancers (HAProxy, NGINX)

Tools / IDEs: IntelliJ, Maven, VS Code, Postman, Figma, Ansible Tower, Vagrant

Methods / Concepts: Agile, Scrum, DevOps, OOP, UML, Infrastructure as Code (IaC), Cloud Security, Microservices

Languages

Arabic (Native) — French (Advanced) — English (Advanced)
